

Class and Sequence Diagrams

Due: Friday, November 5, 1pm

Now that you have figured out the requirements for your project, you are going to plan out how your program should be structured. For this assignment, your team will create a Class diagram, like you did for Design Homework 4, and two different Sequence diagrams, like you did for Design Homework 5. After getting feedback and revision, these will end up in your SRS document.

You may want to revisit the previous design assignments for suggestions on how to do these.
